Git, Docker, AWS, Google Cloud, Agile Development, XCode, Android Studio, Jira

Work Experience

FastAF - Contract Front-end Engineer

July 2020 - June 2022
Involved in creation and upkeep of a rapid delivery e-commerce app.
Work included programming new pages and new components from Figma designs, fixing bugs, conversion to TypeScript, and refactoring old code.
Technologies: React Native, Typescript, Styled Components, React Query, Firebase, Google Maps

PatientPing - Contract Front-end Engineer

October 2019 - April 2020
Project work to merge multiple React-based healthcare applications together.
Technologies: React, Webpack, Jest, Redux, React Router

Zagster - Contract Mobile Engineer

January 2019 - October 2019
Provided ongoing support for existing React Native apps as well as development of a new fleet-management app.
In charge of all aspects of app development, release, and distribution.
Technologies: React Native, GraphQL, Google Maps, Bluetooth, XCode, Android Studio, Microsoft App Center

Zagster - Senior Mobile Engineer

May 2017 - August 2018
Worked on a small team to develop and maintain a bluetooth-enabled iOS and Android rider app for bikeshares.
App handled user registration/billing, displaying location of bikes and stations, locking/unlocking via bluetooth, tracking position during a ride.
Technologies: React Native, Redux, Webpack, Jest, Google Maps, Bluetooth, XCode, Android Stuido, NodeJS, MongoDB

Tapjoy - Senior Front-end Engineer

December 2014 - October 2016
Front-end developer on multiple teams supporting multiple projects for mobile ad delivery.
Delivered a high-end visualization dashboard for advertisers. Oversaw automated build/package delivery system.
Implemented HTML5 mobile video delivery system.
Technologies: Coffeescript, ES6, React, Redux, Backbone.js, Highcharts, JQuery, SASS, Mocha, Grunt, AWS, Ruby/Rails, MySQL

Scout Exchange - Front-end Developer

April 2013 - August 2014

Side Project

Wrdie

https://wrdie.com
Platform for creating online interactive stories and text adventures.
The story editor uses QuillJS to provide a drag and drop interface that allows for the addition of interactivity with no coding.
Technologies: React, TypeScript, GraphQL, TailwindCSS, NodeJS, Express, MongoDB, Docker, Google Cloud Platform
Closed source - github access is available at request

Education

University of Florida

Bachelor of Science *cum laud*, Computer Science, May 2005.
